EMPIRE/EVEREST

Our stainless steel sinks are made of 304 stainless 18/8-chrome nickel content. Our Heavy-duty 18 and 16-gauge stainless steel, nonporous, rust free will last a lifetime.

GENERAL CARE AND CLEANING

After each use rinse the sink with warm water and dry it with a soft cloth to prevent water spots and mineral deposits.

THINGS NOT TO DO

Do no use steel wool, heavy abrasive pads or powders to scrub the sink . Harsh agents such as bleach may ruin the finish.

SURFACE STAIN & RUST

Stainless steel does not rust. If your sink develops surface stains and rust spots use Bar Keepers Friend or Flitz stainless steel cleaning products, which are available from your local hardware store and supermarket.

SCRATCHES

Most scratches can be removed with Bar Keeper Friend and a Scotch Brite Pad. Always rub with the grain. Do not rub against the direction of the finish on the sink, this may damage the finish. If you have a deep scratch use pumice rubbing compound and follow directions on package. Empire strongly recommends the use of its grids to protect the bottom of your sink.
